

AW-CU300A V3 is IoT Connectivity Module for AWS IoT Core, with FreeRTOS qualified MCU that uses AT commands to securely and efficiently communicate with AWS IoT Core

- Hardware specification defined by Amazon and AzureWave
- With this module, end-device become AWS IoT Device
- UART interface for end-device to connect with
- Rich AT commands for end-device to communicate with AWS IoT Core

Hardware Specification

How to Use AW-CU300A V3

- Visit **AWS Partner Device Catalog**
<https://devices.amazonaws.com/>
- Type “azurewave” to search for AW-CU300AV3-USB, it is the development kit of AW-CU300 V3
- Purchase the one or more samples as you need
- Refer to **Getting Started Guide** of AW-CU300AV3-USB to understand how to use it
- Once your evaluation is completed, you could purchase AW-CU300A V3 to implement it to your end-device

AzureWave Technologies, Inc.

Worldwide leading provider of wireless connectivity and image processing solutions
