AW-CU485

IEEE802.15.4 Wireless Microcontroller Zigbee 3.0 Stamp LGA Module

User Guide

Rev. A

(For Standard)

Revision History

Version	Revision Date	Description	Initials	Approved
A	2020/10/19	● Initial Version	Jeff Kuo	N.C. Chen

1. System Setup

(1) Hardware Requirements

- AW-CU485 Module test board
- Host system need running the Window10 x64 operating system
- Vector Signal Analyzer/WLAN analyzer for transmit measurements.
- WLAN signal generator for receiver measurements.
- RF isolation chamber for receive measurements.
- RF attenuators
- RF cable
- NFC reader

(2) Software Requirements

- PL-2303 GPIO Test (tool)

名稱	修改日期	類型	大小
PL-2303 4 GPIOTest.exe	2020/8/11 上午 1...	應用程式	300 KB

- Tera Term (tool)

Note: Tera Term is our suggestion, you can try any terminal tool.

名稱	修改日期	類型	大小
teraterm-4.63.exe	2009/9/8 下午 04...	應用程式	7,045 KB

- DK6Production flash programmer folder (please contact FAE)

Note: You must have below files

機磁碟 (C:) > nxp > DK6ProductionFlashProgrammer   搜尋 DK6ProductionFlash...

| 名稱	修改日期	類型	大小
DK6Programmer.exe	2019/11/16 上午 02:02	應用程式	588 KB
ftd2xx.dll	2019/5/28 下午 07:15	應用程式擴充	215 KB
jn5189dk6_hello_world.bin	2020/4/15 上午 10:11	BIN 檔案	17 KB
JN-AN-1242-JN518x-Customer-Module-Evaluation-Tool.bin	2020/2/28 下午 05:23	BIN 檔案	69 KB
JN-AN-1242-K32W061-Customer-Module-Evaluation-Tool.bin	2020/5/1 下午 09:52	BIN 檔案	56 KB
libgcc_s_dw2-1.dll	2019/5/28 下午 07:15	應用程式擴充	110 KB
pdcurses.dll	2019/5/28 下午 07:15	應用程式擴充	116 KB
programmer.dll	2019/11/16 上午 02:02	應用程式擴充	972 KB
qn9090dk6_hci_black_box_bm.bin	2020/3/3 下午 02:03	BIN 檔案	149 KB
qn9090dk6_hello_world.bin	2020/2/20 上午 10:53	BIN 檔案	21 KB
uninstall.exe	2020/2/13 下午 02:22	應用程式	323 KB

2. AW-CU485 EVB
3. How to download the image

1. You must check the COM number (can check the value by the following picture)
   Note: J9 for DUT COM port
         J10 for PL2303 control Test/Normal mode.
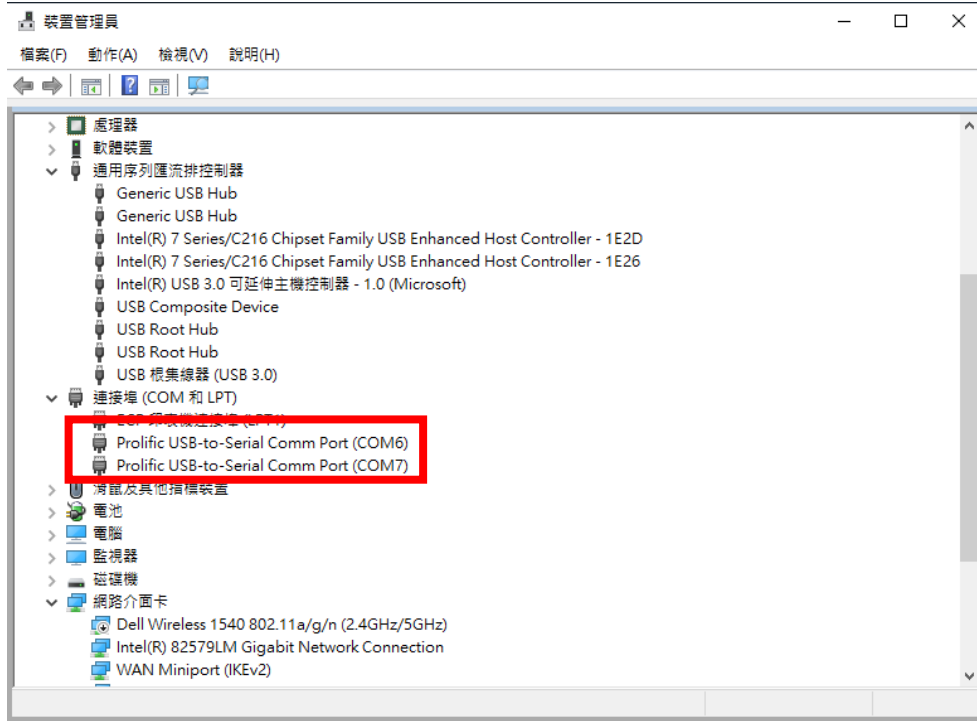

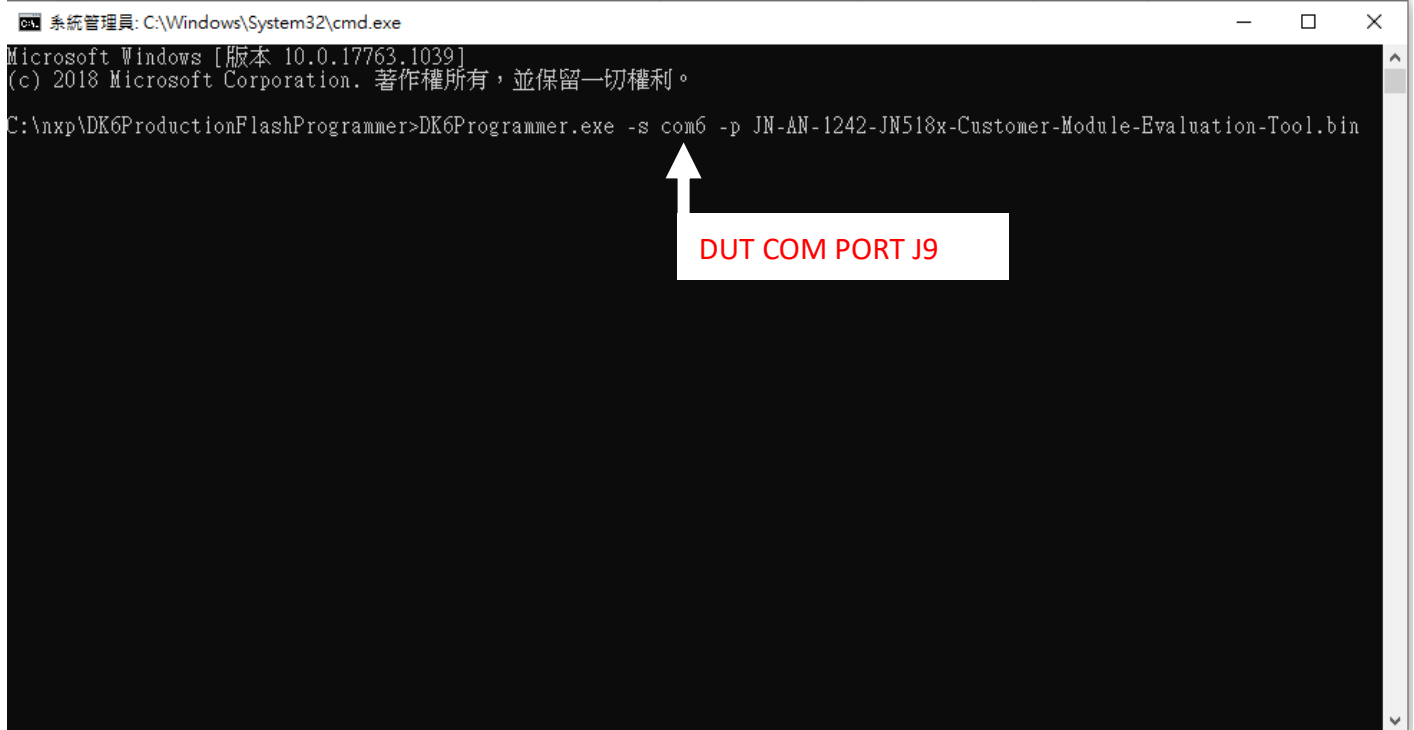

2. Find the folder of DK6ProductionFlashProgrammer.
   And type cmd to get into the Dos window.
3. Key in DK6Programmer.exe -s com6 -p JN-AN-1242-JN518x-Customer-Module-Evaluation-Tool.bin
   To open the tool and download the image file (com6 is your DUT J9 Com port)
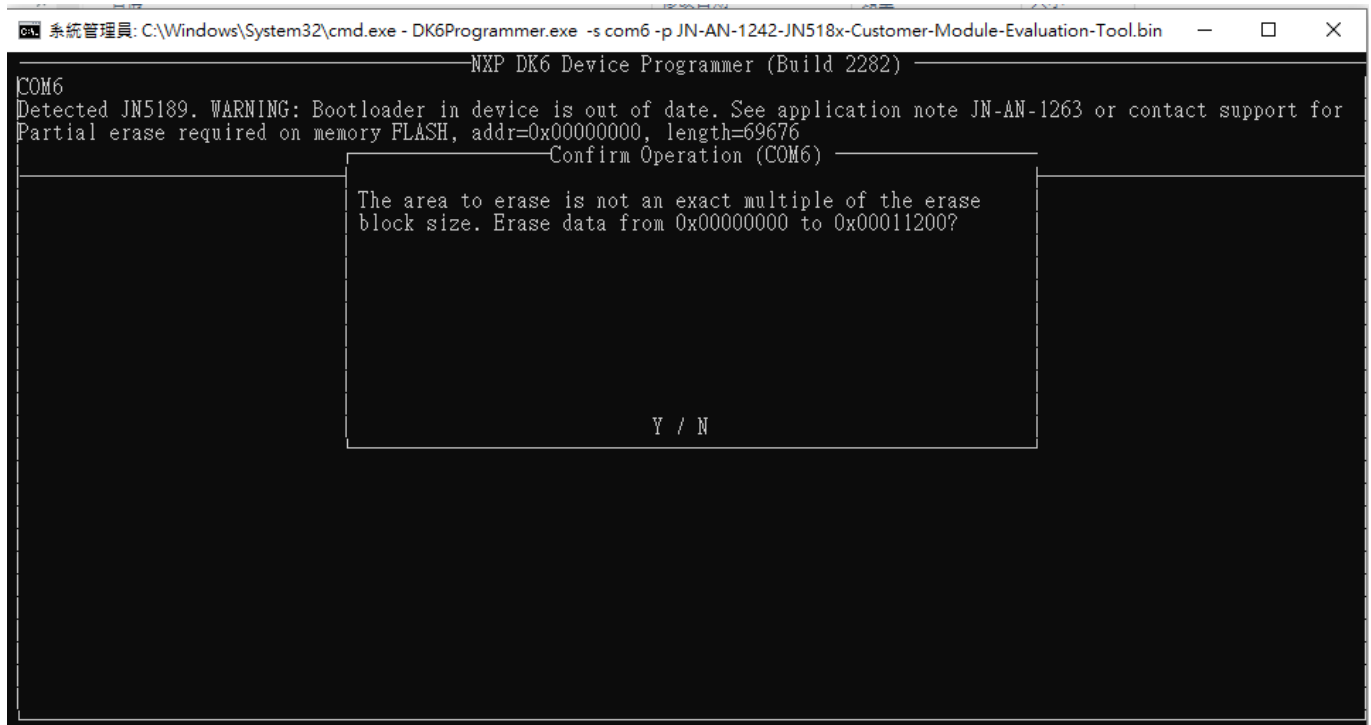

4. Select Y

5. Finish

4. How to get into the test mode

1. Open the PL-2303 GPIO Test
2. Setting Com port (J11 com port)
3. Baud rate is 115200
4. Setting the GP1
   Key in 1 and Select set button.(open test mode)
5. Setting the GP3
   First Key in 0 and Select set button
   Then Key in 1 and Select set button again. (Reset)
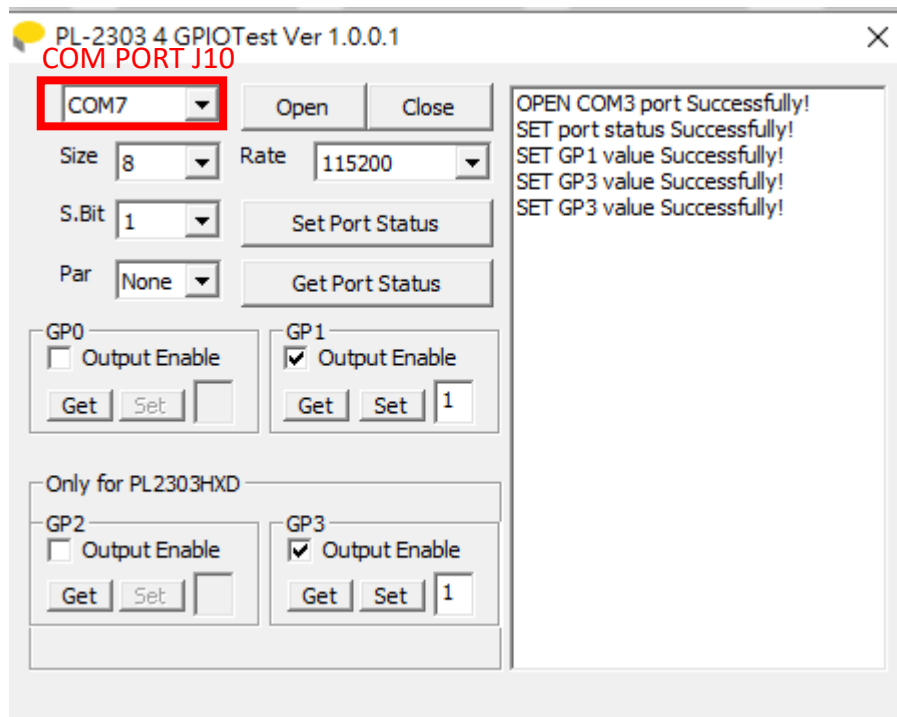

5. Test mode

1. Open the Tera Term
2. Select setup →Serial port
   - Setting COM port (J9 com port)
   - Baud rate is 115200
3. Select setup →Terminal
   - Receive select LF
   - Transmit select CR+LF
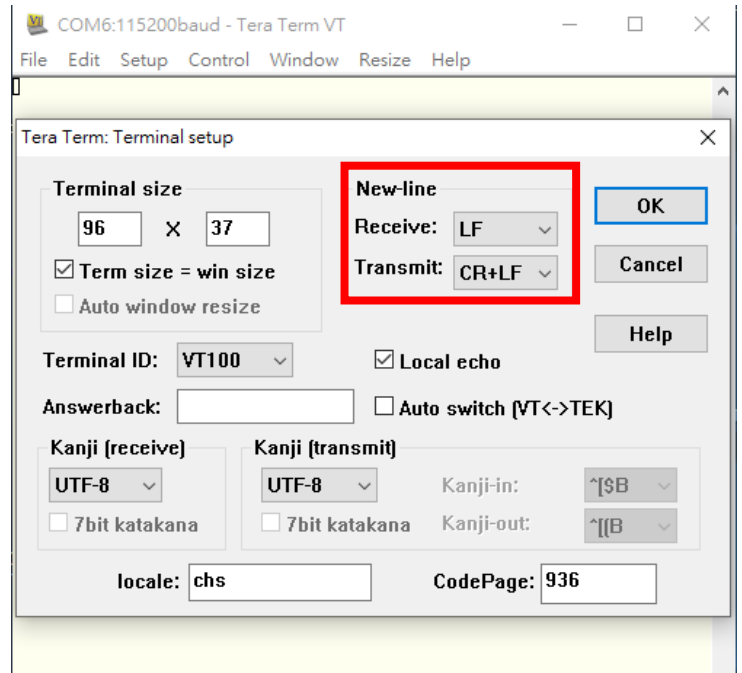

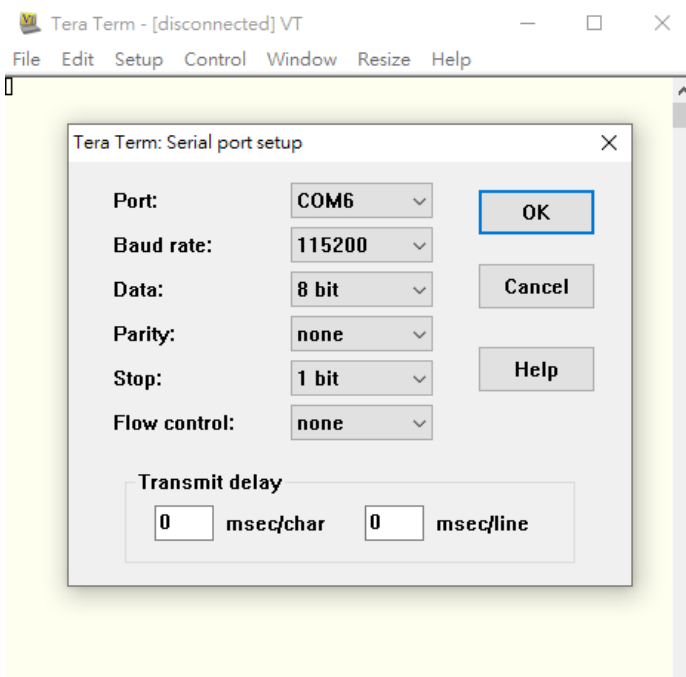

4. Select a) standard module

```

6. Customer Module Evaluation Tool (main menu)

- Select "g" trigger packet test (Rx test)

- Select "I" transmit packet test (Tx test)

```
**********************************************
*    Customer Module Evaluation Tool     *
**********************************************

a) TX Power Test (CW)
b) TX Power Test (Modulated)
c) Receive Test
d) Oscillator Frequency Test
e) Current Measurement Test
f) RF Power Measurement
g) Trigger Packet Test
h) Receive Packets Test
i) Transmit Packets Test
j) Connectionless Packet Error Rate Test
k) CCA Test
l) LQI Test
m) Turnaround Tests
n) NTAG Tests
/) Return to root menu

Please choose an option >█
```

----

6. RX test (Select g)

g → Start test (start to receive the package)

+/- → Increment or decrement channel

X → Return to main menu

/→Reset

```
**********************************************
*           Trigger Packet Test           *
**********************************************
* Key        Function                     *
*                                          *
*   +    Increment Channel                 *
*   -    Decrement Channel                 *
*   ]    Increment Repetitions            *
*   [    Decrement Repetitions            *
*   >    Increase Trigger Delay           *
*   <    Decrease Trigger Delay           *
*   g    Go                                *
*   x    Return to main menu              *
*   /    Return to root menu              *
*                                          *
* Note:                                    *
* Connect pin DIO2 to the trigger         *
*   !!!!! Trig on RAISING edge !!!!!       *
* input on the signal generator           *
**********************************************

Channel        11    (2.405 GHz)
Repetitions    100
Trigger delay 1 mS
█
```

---

7. TX test (Select i)

+/- → Can control the channel

F → Fast transmit rate (fast transmit can help modulation to catch signal)

X → Return to main menu

/→Reset

```
********************************************
*   Transmit Packet Test In Progress     *
*   Slow Rate (~1 Pkt/sec)               *
********************************************
* Key          Function                  *
*                                        *
*   f    Faster transmit rate            *
*   l    Lower transmit rate             *
*   +    Increment Channel               *
*   -    Decrement Channel               *
*   <    Reduce output power by   0.25 dBm *
*   >    Increase output power by 0.25 dBm *
*   p    Reduce power step               *
*   P    Increase power step             *
*   x    Return to main menu             *

Packets Sent 9█
```

---

8. NTAG tests(Select n)

Select Internal or External NTAG

- Select a) internal NTAG

NTAG Tests (Internal)

- Select a) read contents of EEPROM
- Select b) write data to EEPROM

```
***********************************************
* Select Internal or External NTAG          *
***********************************************

a) Internal NTAG
b) External NTAG on DK6 (FD to PIO1)

Please choose an option >A
***********************************************
* NTAG Tests  (Internal)                     *
***********************************************

a) Read contents of EEPROM
b) Write data to EEPROM
c) Reset NTAG address to 0x55
d) Monitor FD pin
e) Test FD pin Wake up
x) Return to main menu
/) Return to root menu

Please choose an option >█
```

---

9. Read contents of EEPROM

Can read the NFC MAC in Block 0: 04830C3AE26180

Open the NFC Taginfo in you smart phone, and scan the NFC

Then you will get the information from NFC

----

10. Write data to EEPROM

Use this test to write data to EEPROM, Format is:

1:0 1 2 3 4 5 6 7 8 9 A B C D E F

Programs 0 to F in block 1

```
********************************************
* NTAG Tests  (Internal)                   *
********************************************

a) Read contents of EEPROM
b) Write data to EEPROM
c) Reset NTAG address to 0x55
d) Monitor FD pin
e) Test FD pin Wake up
x) Return to main menu
/) Return to root menu

Please choose an option >
Using Address: 0x55
Enter Data to Program:1:0 1 2 3 4 5 6 7 8 9 0 A B C D E F□
```

Check the Format again.

```
